2. Electronic forms and supporting documents

2.1 Introduction

The Act requires that documents be submitted in the form designated by the Director. Currently, there are two types of electronic form that may be submitted: EFS forms and Web Filing forms.

EFS forms

EFS was modelled on the pre-existing hardcopy system, with the goal of making only those changes required by the use of information technology to prepare, submit and process documents. EFS forms are published as downloadable templates, which provide a mixture of free form and structured text fields as well as drop down menus and tick boxes where appropriate to select content for the form.

Web Filing forms

Web Filing forms do not use downloadable templates. Instead, applications are created online through a myLTSA Enterprise account. Information required for the application is entered using expandable data entry fields. Once data entry is complete, the required electronic form is generated.

2.2 Directions for electronic forms

Designated forms

- 2.2.1 The Director has designated electronic forms, which are published at <https://ltsa.ca/practice-information/land-title-forms>.
- 2.2.2 A Web Filing form must be completed and electronically signed online using a myLTSA Enterprise account and in compliance with the directions provided in the E-filing User Guides and Publications.
- 2.2.3 An EFS form
 - (a) contains pre-set text, font sizes, forms design and behavior that must not be modified or customized in any way (e.g. adding a firm logo or other identifying marks), and
 - (b) must be completed and electronically signed in compliance with the directions provided in the E-filing User Guides and Publications.

Valid version of EFS form required

- 2.2.4 The Director will publish new versions of the designated EFS forms and retire older versions as required to ensure the efficient registration of land title interests and to protect the integrity of the land title registration system.
- 2.2.5 Except as provided in paragraph 2.2.7, an EFS form must be completed using a valid version of the form.
- 2.2.6 A valid version of an EFS form is a version of the form that has not been retired by the Director. A list of the valid and retired versions of each form is contained in *Valid and Retired Versions of Electronic Forms* published at

https://ltsa.ca/sites/default/files/Valid_and_Retired_Versions_of_Electronic_Forms.pdf.

- 2.2.7 A retired version of an EFS form may be submitted only if the form was executed by a party prior to that version of the form being retired by the Director.

English language

- 2.2.8 An electronic form must be completed in the English language unless the nature of the document renders it impractical.

2.3 Directions for plans and plan applications

- 2.3.1 A plan submitted electronically must contain a serial deposit number allocated by a registrar.
- 2.3.2 Where there is a statutory requirement for a plan to be signed or endorsed by someone other than a BC land surveyor, the plan application must be certified by a designate as provided in [part 3.3](#) of these directions.
- 2.3.3 The application of section 168.31 of the Act is dependent on future enhancements to the electronic filing system. As those enhancements are implemented, additional e-filing directions will be made to enable the electronic signatures required for the application of this section.
- 2.3.4 In addition to the directions for electronic forms in this part, specific directions for the completion of plans and plan applications are contained in *Electronic Land Title Plan and Plan Application Requirements* published at https://ltsa.ca/sites/default/files/Electronic_Land_Title_Plan_and_Plan_Application_Requirements.pdf.

2.4 Directions for corrective declarations

- 2.4.1 A corrective declaration submitted under section 168.55 of the Act must be completed in compliance with the directions provided in the E-filing User Guides and Publications.

2.5 Directions for supporting documents

- 2.5.1 An application that includes a supporting document must be certified by a designate as provided in [part 3.3](#) of these directions. No e-filing direction has been made under section 168.33(1)(b) of the Act to allow for submission of a supporting document under section 168.33.
- 2.5.2 The Director has established directions for preparing and submitting supporting documents in *Supporting Documents for Electronic Applications* published at https://ltsa.ca/sites/default/files/Supporting_Documents_for_Electronic_Applications.pdf.

4.1 Introduction

[Part 3.1](#) of these directions requires that an application be electronically signed by a 'subscriber', as defined in Division 6 of Part 10.1 of the Act. Division 6 sets out a scheme to authenticate and certify individuals who are subscribers. Under this scheme, a subscriber is issued a unique digital certificate by a certification authority recognized by the Director. This certificate is used by the subscriber to create their electronic signature.

The role of the certification authority is to ensure that an individual who applies for a certificate meets the requirements to be a subscriber established by the Director. After a certificate is issued, the certification authority is responsible for administering the certificates in accordance with these directions and its certification practice statement.

5. The Authorized Subscriber Register

5.1 Introduction

Purpose

The Authorized Subscriber Register (ASR) is the LTSA's register of individuals who have been approved by the Director under these directions to be a subscriber for the purpose of electronically signing an application with a specific nature of interest.

The purpose of the ASR is to enable an organization that employs an eligible individual to issue and electronically submit an application regarding an interest in land owned by the organization without having to engage a third party subscriber to electronically sign the application.

Role of the ASR

Membership in the ASR performs a similar function to membership in a governing body for the other types of subscribers. ASR members and their organizations must continue to meet the requirements for membership and must renew their membership annually. The Director may revoke a membership at any time. Each time an application signed by an ASR member is submitted to the land title office, the member's electronic signature is validated against the records of the ASR to confirm their membership status and that they are authorized to electronically sign the form and nature of interest for the application.

Application for membership

To become a subscriber, an individual and the organization for which they work must apply to the LTSA for membership in the ASR and must specify the forms and natures of interest that they will need to sign in order to carry out the organization's business or mandate. An individual must be an employee of the organization, as opposed to a contractor.

Applications for membership are reviewed by the LTSA for compliance with membership requirements. Individuals who are granted membership in the ASR can then apply for a certificate from Juricert using their ASR membership number. Once a member receives their certificate from Juricert and has undergone ASR training, they can use it to electronically sign specified forms as approved by the Director for as long as they maintain their membership in the ASR.
